About Theraclion

Theraclion is a French MedTech company developing a non-invasive alternative to surgery through the innovative use of focused ultrasound.

High-Intensity Focused Ultrasound (HIFU) does not require incisions or an operating room, leaves no scars, and allows patients to resume normal activities immediately. HIFU concentrates therapeutic ultrasound on an internal focal point from outside the body.

Theraclion is developing Sonovein®, a robotic HIFU platform for varicose vein treatment, CE marked under the MDR (EU 2017/745), with the potential to replace millions of surgical procedures each year. To date, Sonovein® has been adopted by more than a dozen centers worldwide and used in over 4,000 procedures. In the U.S., Sonovein® is not yet available for sale.

Based in Malakoff (Paris), Theraclion's team comprises around 35 people.
