

## **Sale of Extended Threat Defense Assets (Mobile Application Protection) to Guardsquare**

- **Completion of the sale of XTD assets (code and mobile application protection), including a portfolio of patents and a team of experts.**
- **The Group is refocusing on anti-piracy (video protection), its core business, which represents approximately 90% of its total revenue.**

**Aix-en-Provence, France and San Diego, USA, February 05, 2026** – [Verimatrix](#), (Euronext Paris: VMX), a leading provider of security solutions for a safer connected world, today announced that it has completed the sale of 100% of its Extended Threat Defense (XTD) assets to Guardsquare, a Belgian company and leader in mobile application security.

This transaction follows the signing of an agreement announced in a [press release on December 8, 2025](#), as well as regulatory approval. It is part of Verimatrix's overall strategy to refocus on its core business, reflecting the group's strategic decision to concentrate on the key growth segments of the video protection market.

Commenting on the announcement, Laurent Dechaux, CEO of Verimatrix, said: *“Verimatrix has a strong technological foundation that enables our teams to pursue new business opportunities. Our priorities are to identify key growth drivers, address our clients’ needs effectively, and optimize resource allocation. I look forward to presenting these strategic initiatives to the market when we release our annual results in March 2026”.*

### **About Guardsquare**

Guardsquare offers the most complete approach to mobile application security on the market, delivering the highest level of protection, with ease. Guardsquare integrates seamlessly across the full development cycle, from mobile app security testing and code hardening to real-time threat detection and app attestation. Guardsquare provides enhanced mobile application security across the entire development process. More than 975 customers worldwide across all major industries rely on Guardsquare to help them identify security risks and protect their mobile applications and SDKs against reverse engineering and tampering in the ever-evolving threat landscape.
