

PRESS RELEASE

Paris, France - 6 May 2026 at 8:00AM CET

Mining Activity for April 2026

- In April 2026, measured in bitcoins, the performance of the servers is higher than that of March 2026, which was impacted by the shutdown of 185 servers located in North Dakota over a few days
- With the price of Bitcoin in the region of US\$76,000, the annualized return for April 2026 is above 11% in a bull market context
- This improved yield reinforces CBI's strategy, the objective being to return to an annualized return of 20% thanks to the rise of Bitcoin

Paris, France, May 6, 2026, at 8:00 a.m. CET (*CBI, Euronext Growth Paris: FR0014007LWO – ALCBI; OTCQB: CBIPF*) – CRYPTO BLOCKCHAIN INDUSTRIES ("CBI") announces that, for the month of April 2026, the yield of mining servers is up compared to the previous month, which was impacted by the shutdown of 185 servers located in North Dakota over a few days. With Bitcoin up to around US\$76,000, the annualized return is just over 11%, an improvement from the 8% recorded in March 2026 with Bitcoin at around US\$70,000. This favorable context reinforces CBI's strategy, the objective being to return to an annualized return of 20% thanks to the rise of Bitcoin.

In April 2026, Crypto Blockchain Industries (CBI) benefited from the return of its Bitcoin mining infrastructure to near full capacity. Measured in Bitcoin, server production has risen again compared to March 2026, thanks to the complete normalization of the situation for the 185 servers in North Dakota that had been affected by a power outage for a few days the previous month.

Measured in US\$, the annualized return is more than 11% for a Bitcoin of around US\$76,000, up from 8% in March 2026 with a Bitcoin of around US\$70,000. This return is calculated by relating the gross margin generated by the activity (Bitcoins received during the month minus the monthly electricity bill) to the amount invested in the servers, all of which is reduced on an annual basis. This performance reflects the ongoing control of operating costs, the energy efficiency of the infrastructure deployed, and the effectiveness of optimization measures implemented across mining operations. The resale price of the servers is not taken into account in these estimates.

This favourable context reinforces CBI's strategy, the objective being to return to an annualised return of 20% thanks to the rise in Bitcoin.

This profitability is likely to increase or decrease depending on various criteria, including the purchase price of the servers, the price of Bitcoin which directly influences the value of the commissions received, the cost of electricity, as well as the difficulty rate of the Bitcoin network which measures the complexity of mining a block. These annualized return figures are estimated for a given month, based on a preliminary electricity bill established by Blockware Solutions. If this invoice is subsequently adjusted by Blockware Solutions to take into account the actual consumption, the estimated yield is then adjusted retroactively.

Composition of the portfolio of crypto-assets and similar assets, including mining servers

CBI's portfolio of crypto-assets and related assets recorded an upward performance compared to the previous month, driven by the rise in the price of Bitcoin to around US\$76,000 and the return to near full capacity of the entire mining server fleet.

The portfolio remains a substantial size, guided by a sustained accumulation objective. It consists mainly of Bitcoins received as part of mining operations, the value of which benefited from the price appreciation in April 2026, in addition to assets directly related to the production infrastructure, in particular mining servers. It also includes fiat currency reserves that the group plans to deploy in accordance with its capital allocation policy.

Tokens created by CBI itself are not subject to an accounting valuation.

It should be remembered that some listed crypto-assets are held for periods of more than twelve months, as part of a long-term investment strategy, a strategy that is now supported by the upward momentum of the market.

April 30, 2026	Quantities	Unit Price	Total Valuation
Main crypto-assets and assimilated			
Bitcoin (*)	26.95	\$76,248	\$2,055,192
Bitcoin (Mining rewards / Server sales)	17.72	\$76,248	\$1,351,489

CTS (****)	420,000,000	Token CBI	Token CBI
Total valuation (US\$)			\$7,782,525

(*) The price of Bitcoin and all other crypto assets is taken at the close of trading on April 30th 2026

(**) Amounts invested in S21+, S21 XP, and S21 Hydro servers, net of disposals

(***) Projects in partnership with third parties - Only the CBI share is reflected in this table.

(****) i.e.: 100 million already allocated in full ownership to CBI; 320 million representing CBI's share in the balance of tokens not yet allocated

Disclaimers

The completion of CBI's projects, as well as their operating budget and financing plan, remain fundamentally subject to major uncertainties, and failure to achieve the underlying assumptions may have a material and adverse impact on the value of CBI's assets and liabilities. In addition, investing in crypto-assets involves risks related in particular to their intrinsic volatility that could have an impact on CBI's financial performance. CBI considers it useful to remember that the past performance of crypto-assets is not a guarantee of future performance. A detailed description of the risks associated with an investment in CBI securities can be found in the Company's financial reports available on CBI's website.

About CRYPTO BLOCKCHAIN INDUSTRIES SA

CRYPTO BLOCKCHAIN INDUSTRIES ("CBI") is a French company listed on Euronext Growth (compartment E2), whose objective is to build the largest possible portfolio of Bitcoins and other crypto-assets by purchasing them at a price below the market by applying the ACE: ACQUIRE strategy, the purchase mainly of Bitcoins on the market; CREATE, the creation of its own utility tokens in the fields of mining and other sectors of CBI activity; EARN, the acquisition of bitcoins at reduced cost via mining operations, as part of a long-term strategic partnership with Blockware Solutions, a provider specializing in infrastructure and hosting for Bitcoin mining operations in the United States.
