Achievements

Organic growth of 5.3% in the second quarter was achieved in a more challenging economic environment.

The most notable growth was in Data, Digital projects, market finance, ITSM (Service Now) solutions, and Business Process Management, with the use of AI both for customer projects and to boost productivity in internal processes.

The challenging environment (pressure on prices, lower utilization rates, unfavorable impact of tax and social measures) led to a 1.4% decline in margins compared to the first half of 2024, resulting in operating profit (*) of 7.8% of revenue for the half-year.

(*) not audited and after inclusion of 1% of expenses related to bonus shares.

Outlook

NEURONES is upping its revenue forecast for the whole year to around €850 million and, with action plans in place, is adjusting its operating profit forecast to around 8%.
