SES Government Solutions Changes Name to SES Space & Defense, Reflecting New Strategy and Capabilities

SES Government Solutions unveils new name to become synonymous with newly expanded capabilities and structure, geared towards the space and defense needs of U.S. DoD

Reston, Va. December 8, 2022 – SES Government Solutions (SES GS), a wholly-owned subsidiary of SES, announced today that it will begin operating under the new name SES Space & Defense effective immediately. The name change comes after combining SES Government Solutions with the [recently acquired DRS Global Enterprise Solutions \(DRS GES\)](#). The SES Space & Defense brand reflects the organization's new positioning and expanded offering serving the needs of the U.S. Government customers.

Over the past four months, SES Space & Defense saw the appointment of its new leadership team, as well as the integration of capabilities that reflect the newly combined organization and differentiated value proposition. The company is focused on building, managing and supporting the most advanced satellite network solutions for the U.S. Government and Department of Defense (DoD). SES Space & Defense has been restructured to serve its customers across two integral markets - space and defense – by creating two business units, Space Initiatives and Defense Networks, to provide best-in-class satellite network solutions.

The Space Initiatives unit targets fleet-centric projects leveraging SES's global multi-orbit satellite fleet, infrastructure, and assets. The Defense Networks unit is centered on multi-operator managed services and end-to-end mission-critical communications.

SES Space & Defense's customers will benefit from new integration capabilities with the addition of the Information & Communications Technology (ICT) Ecosystem and ICT Portal which provides a single pane glass view into network performance, as well as essential tools in cybersecurity.

"This is a major milestone for us, and more importantly for our U.S. DoD customers," said SES Space & Defense President and CEO David Fields. "In August we consolidated two best-in-class organizations focused on the U.S. Government satellite communications needs, and we remain fully committed to providing innovative world-class space solutions to our most tactical customers. With SES Space & Defense as our new name, we would like our strategic vision and focus to come through brightly."

About SES Space & Defense

SES Space & Defense is a wholly-owned subsidiary of SES, the leader in global content connectivity solutions, and is exclusively focused on building, managing, and supporting the most advanced satellite network solutions for the U.S. Government. SES Space & Defense leverages a proven multi-operator network integration and management capability, an extensive global terrestrial network, as well as access to SES's multi-orbit satellite fleet. It also offers U.S. Department of Defense customers the essential tools in cybersecurity for mission-critical operations, coupled with a proven track record in governance and compliance. SES Space & Defense operates under a proxy board, enabling it to support classified projects, and it has been present in the U.S. Government satcom market for over four decades.
