MTI DRIVES FURTHER GROWTH IN THE HYDROPOWER MARKET

FIGEAC AÉRO (FR0011665280 – FGA:FP), a leading partner for major aerospace manufacturers, announces that its defense and energy subsidiary, MTI, has enjoyed strong commercial momentum in the hydropower turbines segment so far this year, with total order intake at end-June 2025 amounting to €4.6 million.

FIGEAC AÉRO is capitalising on MTI's extensive expertise in the strategic hydropower and nuclear energy sectors as part of its PILOT 28 plan aimed at further specialising its production facilities.

Besides its progress in the nuclear energy segment¹, MTI has had a particularly strong first half in the hydropower segment with order intake for turbines totalling €4.6 million at 30 June 2025, of which over €4 million expected to be recorded as revenue this financial year. In addition to hitting a new record high, such strong business activity mid-way through the year clearly points to healthy full-year momentum as order intake so far has already exceeded the €4 million level reached for the whole of last year (when MTI's total revenue came to €10.8 million).

MTI is also benefitting from a particularly vibrant hydropower renovation market as over 1,000 hydropower plants are to be renovated in France over the next ten years; its sales pipeline in this segment is therefore worth several million euros.

Renowned for its expertise in high value-added products in strategic and growth segments, MTI thus faces an extremely bright future. The commercial momentum currently underway means that MTI can expect further profitable revenue growth in the double digits this financial year and beyond, all of which will bring the Group closer to achieving the financial targets set out in its PILOT 28 plan.
