

## DRONE VOLT

# announces that it has appointed an American investment bank with a view to listing on Nasdaq, the leading US market for technology companies

Villepinte, December 9, 2025

**DRONE VOLT, a French manufacturer of professional drones and a leading technology player in aerial robotics, announces that it has initiated a strategic review in order to continue its development trajectory and seek the best valuation for its assets. This review, conducted in collaboration with Maxim Group LLC, a leading investment based in New York, could result in a listing on Nasdaq, the leading US market for technology companies.**

In line with the strengthening of its presence in North America and the two recent capital increases (carried out in March 2025<sup>1</sup> and July 2025<sup>2</sup>), mainly with US investors, DRONE VOLT has embarked on a strategic review to seek the best possible valuation of its technologies and assets. This review could lead to a listing on the US Nasdaq market, which brings together the world's largest technology companies, in addition to its listing on Euronext Growth in Paris.

DRONE VOLT is being assisted in this process by Maxim Group LLC, a leading US investment bank and trusted partner that has already supported the Group in its last two capital increases, carried out mainly with US investors (including its reference shareholder Armistice Capital). Maxim Group LLC will also assist DRONE VOLT in researching and studying potential strategic alliances.

As part of this support and in order to preserve DRONE VOLT's cash flow, Maxim Group LLC will be remunerated in shares up to a maximum of 4% of the capital on a diluted basis (of which 3% is only payable in the event of a Nasdaq listing).

DRONE VOLT will keep the market informed of any significant developments in this process as soon as possible.

Stefano VALENTINI, Chairman of the Board of Directors of DRONE VOLT, said:

*"We are very pleased to be working again with Maxim Group to increase the value of DRONE VOLT for shareholders and unlock the full potential of our technological expertise, as well as to build global recognition in line with our commercial across all development continents."*

***Next press release: 2025 annual revenue, January 2026.***
