December 11, 2025

Edenred and Daimler Truck join forces to accelerate the rollout of charging infrastructure for electric trucks in Europe

Edenred is partnering with Daimler Truck to strengthen the development of electric charging infrastructure in Europe and support the energy transition in road transport. Using its advanced eMobility platform, Spirii, an Edenred subsidiary, will provide the software backbone to TruckCharge, the future semi-public Network announced by Daimler Truck in the beginning of 2025. On top of this new partnership, Edenred will continue to provide access for Mercedes Benz electric trucks to the large UTA Edenred public charging network via the Mercedes ServiceCard charging card.

Spirii: advanced software technology for the TruckCharge Network

With the launch of the TruckCharge Network, Daimler Truck aims to offer Europe's leading exclusive charging network for heavy transport. This program responds to the urgent need for flexible charging infrastructure to meet the climate targets set by the European Union for 2030. This semi-public network will enable companies with charging stations on their premises to open them up for paid use by approved third parties, maximising the use of existing and future infrastructure.

Spirii, Edenred's subsidiary specialising in e-mobility solutions, will provide a Charge Point Management System (CPMS) and an eMobility Service Provider platform (EMSP) allowing depot operators to manage, monitor, and optimise their charging infrastructure, while offering a seamless experience to fleet operators via a tracking, booking, and payment platform. This technology will enable fleet operators to improve planning and control the costs associated with the electrification of their activities.

UTA Edenred and the Mercedes ServiceCard charging card: simplified access to public charging infrastructure

At the same time, Daimler Truck and UTA Edenred are continuing their long-standing partnership to simplify access to public charging facilities for electric truck fleets. With the Mercedes ServiceCard charging card, Mercedes Benz Trucks' client companies can access the large and continuously growing UTA Edenred public charging network of approximately 420 truck-compatible stations. Part of these are the fast-charging stations of Milence—a joint venture founded by Daimler Truck, Traton Group, and Volvo Group.

Public charging in the UTA Edenred public network is currently available for Daimler Truck customers based in 23 countries and the offering is gradually expanded into new markets, enabling electric fleet managers to plan their journeys with peace of mind and access public stations at controlled costs.

Diane Coliche, Global Chief Operating Officer, Mobility at Edenred, said "Our partnership with Daimler Truck illustrates our shared ambition: to make charging electric trucks accessible, reliable, and efficient. Leveraging Spirii's innovative and future-proofed technology and capabilities, UTA Edenred's extensive public network and Daimler Truck's expertise, we are building an ecosystem that simplifies the electrification journey for companies and promotes sustainable mobility at scale in Europe."

Edenred is the leading digital platform for corporate services in the areas of benefits, professional mobility, and B2B payments.

Operating in 44 countries, it connects more than 60 million users to over 2 million partner merchants through more than 1 million client companies.

Edenred offers solutions dedicated to employee engagement (meal vouchers, commuting, gift vouchers, wellness, rewards, and preferential offers to boost purchasing power), mobility (multi-energy solutions, including EV charging, fleet management services, maintenance, toll, and parking), and corporate payments (virtual cards). In addition to its own solutions, Edenred also distributes offers from more than 120 partners on its platform.

True to the Group's purpose, "Enrich connections. For good.", these solutions enhance users' well-being and purchasing power and simplify the lives of professional drivers while promoting access to healthier food, more environmentally friendly products, and more sustainable mobility. They improve the attractiveness and efficiency of businesses and vitalize the employment market and the local economy.

Edenred's 12,000 employees are committed to making the world of work a connected ecosystem that is safer, more efficient and more responsible every day.

In 2024, thanks to its global technology assets, the Group generated a business volume of nearly €45 billion, mainly through mobile applications, online platforms and cards.

Edenred is listed on the Euronext Paris stock exchange and included in the following indices: CAC 40, CAC 40 ESG, CAC Large 60, Euronext 100, Euronext Tech Leaders, FTSE4Good, DJSI Europe Index, DJSI World Index, and MSCI Europe.
