## Breakdown of first-half revenue by business

**Homecare:** Revenue amounted to €101.4 million, up 6.5%, driven by the momentum of rental activities in the healthcare institutions and stores businesses.

- In the **healthcare institutions** business, revenue amounted to €46.7 million, up 12.2%. This strong growth results from the exceptional contribution of certain contracts, the strong performance of the more profitable rental activities, which are at the heart of the Group's strategy, and gains in a number of smaller markets.
- **Stores/online** revenue amounted to €54.7 million, up 2.1%, boosted by an upturn in rental activities in the stores business and online sales.

**The Respiratory business** maintained its excellent performance, with revenue up 11.0% on an organic basis to €85.9 million (up 10.4% as reported, due to the decrease in the Canadian dollar and the pound sterling against the euro). In France, despite the impact of the 5% price cut in the sleep apnea segment, effective since April 1, 2025, momentum remains strong with organic growth of 8.3% thanks to market share gains in a buoyant segment. Internationally, business momentum is particularly robust, with organic growth of 21%, driven by the effects of the new contract in British Columbia in Canada, as well as excellent momentum from Oxystore in Italy and Intus in the United Kingdom.

**The Nutrition-Perfusion-Diabetes-Stomatherapy business** reported revenue of €73.0 million, up 7.2%, thanks to the double-digit growth of the Diabetes business and the recovery of the Stomatherapy business resulting from the Group's restructuring efforts.

## 2025-2026 outlook

The structural growth of the market, combined with Groupe Bastide's competitive positioning, enables the Group to confirm its cautious target of annual revenues of at least €510 million for the 2025-2026 fiscal year, while maintaining an operating margin of around 9.0%.

In addition, the impact of asset disposals completed in the first half, together with careful management of working capital and investments, will support the Group's ongoing debt reduction and improvement in financial ratios, with net debt/EBITDA expected to drop below 3 by December 31, 2025.
