

OPmobility awarded an “A” Score for the second consecutive year by CDP for its Climate actions

For the second consecutive year, OPmobility has been awarded the highest score from CDP for its climate actions. The “A” score recognizes, in particular, OPmobility’s ambitious roadmap, carbon neutrality objectives across its entire value chain, and the quality of its environmental reporting. The Group remains on the A-list of the world’s best-performing companies, that represents less than 2% of the more than 22,000 assessed by CDP in 2024.

In 2021, OPmobility began rolling out its roadmap to be net zero in 2050 according to the Business Ambition for 1.5°C of the Science-Based Targets Initiative (SBTi). In 2024, OPmobility kept on reducing its CO₂ emissions on scopes 1 and 2 and implemented all actions to reach carbon neutrality on these scopes in 2025¹. The Group also targets a 30% reduction in upstream and downstream scope 3 emissions by 2030 compared to 2019². These targets are approved by the Science Based Target initiative (SBTi)

Since 2021, the actions implemented by the Group have enabled to significantly increase its energy efficiency. In 2024, it improved by 22% compared to 2019, excluding the Lighting acquisitions made in 2022. In addition, in 2024, 12 new solar panel installation projects were launched, bringing the total number of equipped sites to 35.

Laurent Favre, Chief Executive Officer of OPmobility, says: "Obtaining the highest score from CDP for a second consecutive year is a recognition of OPmobility's concrete progress over the last years to lower its carbon footprint, with clear milestones in 2025 and 2030 towards being net zero by 2050. More than ever, the Group remains fully committed to transforming its operations, value chain and products in order to reach carbon neutrality and contribute to the development of sustainable mobility."

¹ For Lighting acquisitions made in 2022, carbon neutrality for scopes 1 and 2 by 2027.

² On historical perimeter excluding Lighting acquisitions made in 2022

About OPmobility

OPmobility (formerly Plastic Omnium) is a world leader in sustainable mobility and a worldwide technology partner to actors from every mobility sector. Innovation-driven since its foundation in 1946, OPmobility has complementary Business Groups offering its customers a wide range of solutions: intelligent exterior and lighting systems, customized complex modules, energy storage systems, and battery and hydrogen electrification solutions. OPmobility's customers also benefit from OP'nSoft, its inhouse software development specialist.

With €11.4 billion economic revenue in 2023 and an international footprint of 152 plants and 40 R&D centers, OPmobility relies on its 40,300 employees to meet the challenges of making mobility more sustainable.

OPmobility is listed on Euronext Paris, compartment A. It is eligible for the Deferred Settlement Service (SRD) and is part of the SBF 120 and CAC Mid 60 indices (ISIN code: F FR0000124570). www.opmobility.com
