## and TotalEnergies

### have entered into a strategic partnership

---

Villepinte, August 19, 2025

**DRONE VOLT, a manufacturer of professional civilian drones and expert in embedded solutions, announces the signing of a strategic partnership with TotalEnergies, a leading multi-energy company, for the deployment of professional drone inspections at several sites in France and internationally.**

#### **A major industrial partnership**

Under this agreement, DRONE VOLT will act as an expert, through its DRONE VOLT EXPERT office, to provide technical and operational services.

The services to be provided are specialized drone missions requiring the deployment of specific equipment developed by TotalEnergies.

These missions, which are environmental in nature, will mainly involve monitoring as part of protocols related to greenhouse gases and will be carried out primarily in France, with occasional extensions abroad.

#### **A drone solution for the energy transition**

This partnership aims to support TotalEnergies' sites and infrastructure in their energy transition by integrating cutting-edge technologies in the following areas:

- Environmental control and detection of leaks or anomalies;
- Reducing the carbon footprint of technical interventions through the use of aerial vehicles such as drones.

#### **Expertise serving industrial and environmental challenges**

Through its DRONE VOLT EXPERT office, the DRONE VOLT Group mobilizes its network of qualified operators, its proven procedures, and its expertise in onboard sensors to meet TotalEnergies' operational needs with precision, reliability, and regulatory compliance.

*"This partnership illustrates our ability to support large companies in the integration of professional drone solutions with efficiency and rigor,"* said Marc Courcelle, CEO of DRONE VOLT.

**Next press release: 2025 half-year results, Wednesday, September 17, 2025.**
