## **Press release**

### **Eiffage Énergie Systèmes delivers an order intake of almost €950 million in Germany in the first half of 2025**

Eiffage, through its subsidiary Eiffage Énergie Systèmes, has been awarded several major contracts in Germany since the beginning of the year, further consolidating its leadership position in the energy services market on this territory. During the first half of 2025, its order intake in the country totalled close to €950 million.

Alongside long-standing Elomech, Schwarz & Grantz and Nat, the companies Salvia and Eqos acquired in 2023 and 2024 respectively have provided Eiffage Énergie Systèmes with a comprehensive offering and diversified presence across the industry, infrastructure and networks, local authorities and commercial markets throughout the territory. This change in scale has made Germany one of Eiffage Énergie Systèmes' largest countries, where it now has a workforce of more than 5000 employees.

Among the many contracts awarded during the first semester was the large electricity transmission deal sealed by Eqos as part of the extension of the electricity grid Rhin-Neckar-Nord Bade. TransnetBW, an electricity transmission grid operator, awarded Eqos a contract to build high-voltage lines and replace cables over a 31 km trunk between Philippsburg and Karlsruhe-Daxlanden. Ultimately, the upgrade will cover the region between Frankfurt am Main and Karlsruhe and considerably increase the electricity grid's transmission capacity. Works are due to begin in early 2026.

This project will scale up Eiffage's footprint in Germany's energy infrastructure market.

#### **About Eiffage**

Eiffage is one of Europe's leading construction and concessions companies. The Group's activities are organised around the following business lines: construction, property development and urban development, roads, civil engineering and metallic construction, energy systems and concessions. Thanks to the experience of its more than 84,400 employees, Eiffage generated revenue of €23.4 billion in 2024, of which 34% was outside France.

#### **About Eiffage Énergie Systèmes**

Eiffage Énergie Systèmes designs, builds, operates and maintains electrical, industrial, HVAC and energy systems and facilities while respecting people and protecting the environment. Eiffage Énergie Systèmes provides a customised offer for the industrial, infrastructure and network markets, local authorities and the commercial sector. Eiffage Énergie Systèmes generated revenue of €7.2 billion in 2024.
