

3 new cogeneration units installed in Wallonia

Pontpierre, France, January 20th, 2022 - La Française de l'Énergie (Euronext: LFDE - ISIN: FR0013030152), a carbon negative energy producer, announces the commissioning of 3 additional cogeneration units at its Anderlues site, in Wallonia, which **installed capacity increases from 3.0 to 7.5 MW**, as per its planned field development.

This very significant increase in production capacity in Belgium occurs in a particularly favorable electricity price environment with **average sales prices expected at more than € 200 per MWh in the first quarter**.

A major contribution to the reduction of greenhouse gas emissions

Thanks to the 5 cogeneration units now installed, the capture of coal mine gas on the Anderlues site will allow the group to avoid an annual emission of over **500 000 tonnes of CO₂eq** and will foster the positioning of La Française de l'Énergie as one of the main players in the energy transition of the Walloon region.

La Française de l'Énergie confirms its objective of achieving annualized revenue of €35 million and an EBITDA margin of over 45% by the end of 2022.

About La Française de l'Énergie

La Française de l'Énergie is a carbon negative energy producer, specializing setting up decentralized energy production sites. La Française de l'Énergie supplies gas, green electricity and heat to regional players, thus replacing imported energy with local, cleaner energy. La Française de l'Énergie has strong development potential and aims to become a benchmark independent player in the energy sector in Europe. The company benefits from the innovative company label awarded by Bpifrance.
