Figeac, France, 26 May 2026

EXTENDED PARTNERSHIP WITH A US CUSTOMER

FIGEAC AÉRO (FR0011665280 – FGA:FP), a leading partner for major aerospace manufacturers, today announced an extension of its partnership with one of its customers in the United States, with a new multi-million dollar agreement to produce wing spars for a civil aircraft.

This US customer, a leading civil & military aircraft manufacturer, has selected FIGEAC AÉRO Wichita (FIGEAC AÉRO North America) for the production of wing spars to be fitted on one of their civil aircraft. Wing spars are large, machined aluminum parts which are the main spanwise structural component of the wing, often extending from its root all the way to the tip and supporting weight and aerodynamic loads.

This new award builds on an existing relationship, which originates from a previous agreement covering wing parts on another aircraft program. Beyond strong customer relationship, FIGEAC AÉRO Wichita has leveraged two other major assets, both front and center of the Group's strategy: first, competitiveness born out of a combination of specialized know-how and technology – here, on large-size aluminum machining – and second, close proximity to customers.

Production is to take place at the Group's Wichita facility and start as early as the second half of the current financial year. No major capital expenditure is expected as production will make use of existing industrial capacity.

Shane Torgler, General Manager of FIGEAC AÉRO Wichita declared: *"This new award illustrates both the potential for further development which had been identified at the initiation of the partnership, and our overall outlook serving the growing needs of customers in the civil and military segments in the US."* Benjamin Thomas, VP Operations North America for the FIGEAC AÉRO Group, confirmed: *"We can be very happy with the overall progress of our North American operations. Both the Wichita & Chihuahua sites are delivering on the Group's initial expectation that they would be instrumental to achieving our overall business development objective."*

With this latest win, FIGEAC AÉRO further progresses on its new business path and confirms its objective of achieving between €80 million and €100 million of annual revenue by March 2028.
