

## Official launch of three New PediGuard® Models during the Annual Scoliosis Meeting in China

### *Presentation of PediGuard in plenary session*

**PARIS and BOULDER (CO), April 28, 2026 – 06:00pm CEST - SpineGuard** (FR0011464452 - ALSGD), an innovative company that deploys its DSG® (Dynamic Surgical Guidance) local conductivity sensing technology to secure and streamline the placement of bone implants, today announced the official launch of the newly cleared Curved and XS PediGuard models, in Nanjing (China), during the 2026 Chinese Scoliosis Annual Meeting in conjunction with French Spine Society. PediGuard has been highlighted by Professor Helton Defino from Ribeiro Preto (Brazil) during his lecture in plenary session.

**Patricia Lempereur, VP of Sales and Marketing at SpineGuard, said:** *“The new versions of the PediGuard recently approved in China and showcased at XinRong Medical booth, created a great interest among the surgeons, especially the curved version. They can see a real benefit in scoliosis surgery where the vertebral anatomy can be complex. The first evaluation surgeries have already been performed in China with a great success. This congress hosted by Professor Qiu was the opportunity to reinforce our collaboration with our Chinese commercial partner.”*

**David Han, Board Director at XinRong Medical, added:** *“We are excited to launch new models of PediGuard with SpineGuard. The new models are great extensions to the current lineup, and they represent originality and continuous innovation of PediGuard. XinRong Medical will deepen our collaboration with SpineGuard and further explore the opportunities for the DSG technology on the Chinese market”.*

#### **About SpineGuard®**

Founded in 2009 in France and the USA by Pierre Jérôme and Stéphane Bette, SpineGuard is an innovative company deploying its proprietary radiation-free real time sensing technology DSG® (Dynamic Surgical Guidance) to secure and streamline the placement of implants in the skeleton. SpineGuard designs, develops and markets medical devices embedding its technology. Over 110,000 surgical procedures have been secured worldwide thanks to DSG® and 39 studies published in peer-reviewed scientific journals have demonstrated the multiple benefits DSG® offers to patients, surgeons, surgical staff and hospitals. Building on these strong fundamentals and several strategic partnerships, SpineGuard is expanding the scope of its DSG® technology to the treatment of scoliosis via anterior approach, sacroiliac joint fusion, dental implantology and innovations such as the « smart » pedicle screw and power drill or surgical robotics. DSG® was co-invented by Maurice Bourlioni, Ph.D., Ciaran Bolger, M.D., Ph.D., and Alain Vanquaethem, Biomedical Engineer. SpineGuard has engaged in multiple ESG initiatives.
