

Air Liquide reinforces its leadership in Electronics with a total investment of 130 million euros to supply a major semiconductor manufacturer in Singapore

In the frame of two new long-term contracts, Air Liquide will build, own and operate two new state-of-the-art industrial gas facilities to support the expansion of a leading semiconductor manufacturer in Singapore, for a total investment of 130 million euros. Ultra-high purity gases are essential to accompany the next wave of digital technologies, including AI. These new contracts, signed just a few months apart, highlight the acceleration of demand for advanced electronics components in this key hub.

Air Liquide's next-generation facilities will supply **large volumes of ultra-high purity nitrogen to support the production of advanced chips**. Integrated with digital technologies such as automation and predictive maintenance, Air Liquide's new infrastructures will enhance energy efficiency, operational reliability and quality control, delivering value to the customer. The new units are projected to be operational by 2027, further leveraging the Group's expertise and extensive footprint in the region.

With these investments, **Air Liquide reinforces its forefront position in Singapore but also more broadly in Asia**, where Air Liquide is the **leading gas supplier to the Electronics industry** thanks to its innovative and reliable solutions. In addition, this new series of contracts with a long-standing customer demonstrates its confidence in the Group's proven ability to deliver industrial gas technologies with the highest standards of quality, reliability and safety.

Ronnie Chalmers, Air Liquide Group Vice President, in charge of supervising Asia Pacific, commented: *"Innovation and reliability are at the heart of our business. These contracts are a true testimony of our client's continued trust, and this move enhances Air Liquide's position as a leading technology partner to the global semiconductor industry, which continues to rapidly expand in Asia and worldwide. Our advanced solutions will provide the highest levels of reliability and efficiency, demonstrating our strong commitment in delivering the best value to our customers and empowering the future of AI and high-tech innovation."*

Air Liquide in Singapore

Air Liquide's operations in Singapore and Riau Islands dates back to 1911. With more than 100 years of expertise, our highly-skilled workforce of approximately 800 employees support customers in diverse industries through our unique blend of advanced equipment, processes & systems, supported by a highly engaged and competent workforce.

Air Liquide is a world leader in gases, technologies and services for industry and healthcare. Present in 60 countries with approximately 66,500 employees, the Group serves more than 4 million customers and patients. Oxygen, nitrogen and hydrogen are essential small molecules for life, matter and energy. They embody Air Liquide's scientific territory and have been at the core of the Group's activities since its creation in 1902.

Taking action today while preparing the future is at the heart of Air Liquide's strategy. With ADVANCE, its strategic plan, Air Liquide is targeting a global performance, combining financial and extra-financial dimensions. Positioned on new markets, the Group benefits from major assets such as its business model combining resilience and strength, its ability to innovate and its technological expertise. The Group develops solutions contributing to climate and the energy transition — particularly with hydrogen — and takes action to progress in areas of healthcare, electronics and high technologies.

Air Liquide's revenue amounted to more than 27 billion euros in 2024. Air Liquide is listed on the Euronext Paris stock exchange (compartment A) and belongs to the CAC 40, CAC 40 ESG, EURO STOXX 50, FTSE4Good and DJSI Europe indexes.
