FIGEAC AÉRO NORTH AMERICA AWARDED NEW CONTRACT BY BOMBARDIER

FIGEAC AÉRO (FR0011665280 – FGA:FP), a leading partner for major aerospace manufacturers, announces that its American subsidiary FIGEAC AÉRO North America has been awarded a new contract worth a total of \$8 million to supply tailplane skins for Bombardier's business jets.

A PERFECT FIT WITH FIGEAC AÉRO NORTH AMERICA'S EXPERTISE

Through this agreement, FIGEAC AÉRO North America will be involved in the manufacturing of the metal skins used in the vertical stabilizers of Bombardier's Global 7500 and Challenger 350 business jets – an empennage vertical structure enabling aircraft stability and directional control. More specifically, the contract concerns the high value-added phases involved in the metal forming and surface treatment of these large-scale panels – such expertise is at the very core of the activities carried out by the Group's American subsidiary and has enabled it to win this new contract.

It is a multi-year contract worth a total of \$8 million and is expected to contribute to the Group's revenue as of the second half of this financial year. It meets all of the Group's financial criteria with services provided solely based on the Group's existing production capacity and no need to source metal raw materials.

NORTH AMERICA, A GEOGRAPHIC PILLAR OF PILOT 28'S SUCCESS

This latest development is testament both to the technical capabilities and expertise that have been developed at FIGEAC AÉRO North America and to the Group's determination to support Bombardier's growth as a global business aviation leader.

In keeping with the geographical development targets set out under the PILOT 28 business plan, 35% of the new business brought in to date has concerned productions located in the Group's North American subsidiaries. All in all, FIGEAC AÉRO has now secured nearly 50% of its new business revenue target and is confident that it will meet this target in full.
